DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 12, 13, 15, 16, 17, 18, 21 and 23 are rejected under 35 U.S.C. 102(b) as being anticipated by Crawford et al.

Crawford et al teach an assembly, Figs.1-2, comprising: a heat-generating devices – transistor dies 13 attached to a printed circuit board 12, and a thermal management system comprising a heat sink (the right part of the assembly with fins 25) having an interior lumen 23, and a coolant (liquid and gas) circulation channel 17 formed in a layer of the printed circuit board 12, wherein said coolant circulation channel 17 is in fluid communication with said heat sink interior lumen 23, wherein the printed circuit board 12 comprising a plurality of devices 13 mounting areas and the cooling channels 17 have a portion in a vicinity of each mounting areas. Regarding to the claims 15-16: the method of forming the device is not germane to the issue of patentability of the device itself. Therefore, these limitations have not been given patentable weight.

Allowable Subject Matter

3. Claims 14, 19-20 and 22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2835

4. The following is a statement of reasons for the indication of allowable subject matter: The assembly further comprising a pump (claim 14); the portion of the channel is formed by a surface of the heat-generating device (claims 19-20 and 22).
